Jordan M. Alperin

236 Mullen Ave   •   San Francisco, CA 94110   •   Cell: 650-796-1248   •   E-mail: alpjor@alpjor.com

I'm a senior application developer with 20 years of experience looking for an architect, manager or early employee level role where I can partner closely with a team I love on a project with meaningful human impact. I love my family, living in San Francisco, snowboarding, listening to music, brewing beer, riding motorcycles, playing video games and changing the world for the better.

Recent Work and Leadership Experience

Rende   San Francisco, Ca. Sep '16 – present

Co-founder, CTO, Lead Engineer. I want to make something to help people get together in real life and to help form new friendships. www.rende.today Rende is a Hybrid Progressive Web App that deploys to iOS, Android, mobile and desktop web platforms from a single code base. Integrations with AWS, Twilio, BugSnag, Postmark, Google Maps and Places services, Facebook and more. Frameworks and software stack include React.js, Redux, Express, memcache, mysql, webpack and more.

Bolt.com   San Francisco, Ca. Sep '14 – Sep '16.

Lead Frontend Developer. Built a number of early prototypes of the current bolt product as well as early explorations that were not released. Grew the engineering team from 2 to 17 over two years. Heavily involved in recruiting and hiring. Built initial integrations into BigCommerce, Shopify, and Magento systems. Built Bolt's Javascript SDK and e-commerce checkout client. Full compatibility down to IE9 standards

Facebook   Palo Alto, Ca. Oct '09 – Jun '14.

Software Developer. Mobile Performance Team. Responsible for client and server side metrics for all facebook mobile products (m-site, ios, android, BB, and WinMobile) for performance, reliability and efficiency. Developed frameworks for mobile development and deployment. Lead developer for Games Platform (~15 engineers + designers). Rewrote Canvas page (on-site apps and games, >4B hits / day, ~5% of all of FB traffic, ~35% of site ad revenue), Tamed on-site App/Game spam, Wrote Games Live-Chrome experience (heavy javascript Interactions, large datasets), Worked on Facebook Connect JS and Social Plugins (Like button, Social bar).

Digg Inc.   San Francisco, Ca. Apr '08 –Oct '09.

Software Developer. Worked with teams to continue to scale and develop digg.com's internet infrastructure. Developed and implemented Digg's javascript/CSS loader and compressor. Rewrote all javascript on site (now 60% smaller, all the same functionality). Worked on Facebook Connect implementation. Led front-end optimization efforts. 3rd party integration specialist.

Rexee Inc.   San Mateo, Ca. Jul '07 – Feb '08.

UI Lead. Responsible for Product / Project Management and Frontend Developer duties. Managed a team of 4 to redesign and build an online video aggregation site. Architected and deployed a scalable web infrastructure supporting hundreds of thousands simultaneous users. Optimized web site code for SEO. Worked with business to develop products name, logo, and design.
